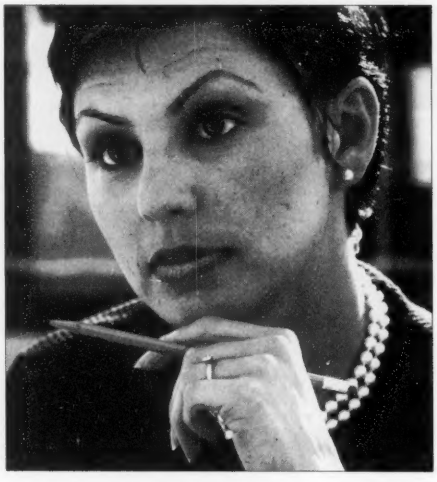
1999 *InTech* Article Title Index

Title	Page #
January	
1999 Outlook: From the control room to the field	38
Accidents lead to modern safety-instrumented systems	48
Generation-next mass flowmeter arrives	58
Improved data acquisition brings catalyst pilot plant under control	62
February	
For remote stations, fieldbus + PLC + radio = economical network	46
Fieldbus pilot plant installation oiling the works in Canada	50
Cargill Y2K targets	53
Exploiting variable-speed drives	59
March	
Utilities deregulation instigates new services	40
New protocol widens fieldbus	48
Plant safety comes in numbers, assumptions	52
Avoid getting caught in the crossfire	56
April	
Putting the squeeze on time	38
Configuration tools: Removing the complexity from start-up is goal	43
Harnessing positive feedback	48
Real rewards from artificial intelligence	52
May	
Fuzzy logic merges with bang-bang, PID	38
Stress relief: instrument databases	42
Smart transmitters boost distillation	46
CEMS: Costly compliance tools	57
June	
Predictive maintenance profits from sensor diagnostics	36
Sensor market goes global	40
Ethernet to link automation hierarchy	44
Pennzoil gushes offshore	51
Control-valve sizing improved	54
July	
Engineers face the human factor	46
Online expert-system applications use in fermentation plants	50
Sound, sewer reach truce	56
No more thermocouples blues	60
August	
Validation plugs regulatory holes	36
Death by blue screen not an option	40
Get out on the Y2K highway—now	44
September	
Engineers' pay gets a boost	48
Not just smart, they're sassy	53
Satellite keeps an eye on underground water	57
The machine defines the maintenance schedule	63
Tricky buying decision looms	68
October	
Oxide humidity sensors work frigid zone	42
You're nowhere in Vegas without juice	46
Microwaves calm down black liquor recovery	50
Online titrations tighten control	54
November	
Safety can go wrong—fast	40
Humans tend to make mistakes . . . then accidents happen	44
Digital communications guarantee valid safety shutdowns	48
Field calibration chaos ceases	52
December	
Industry looks to the future	40
Fieldbus Part 4: Troubleshooting: Hired guns stalk network villains	49
Panama Canal remains "world's greatest engineering project"	54
Inside or outside, users need an edge	56

Jim, for the Unit 6 Project . . . have you called Foss NIRSystems?



In 1988, Foss NIRSystems got their first call for a near-infrared analyzer to determine composition for control of a process stream.

1,523 installations later, their phones are still ringing.

Call Foss NIRSystems for all of your liquid, solid, powder, and slurry process measurement applications.

Foss NIRSystems — The World's Leader in NIR Solutions

Foss NIRSystems, Inc., 12101 Tech Road, Silver Spring, MD 20904 USA

Tel: 800-343-2036 Fax: 301-236-0157 e-mail: www.foss-nirsystems.com
